In re:	Patent Application of Jean-Claude Bradley	: Group Art Unit: 1741 : :
Conf. No.:	4320	: Examiner: W. Leader : :
Appln. No.:	09/576,521	: Allowed: August 14, 2001 : Batch No. K61 : :
Filed:	May 23, 2000	: : :
For:	ELECTRIC FIELD DIRECTED CONSTRUCTION OF DIODES USING FREE-STANDING THREE- DIMENSIONAL COMPONENTS	: Attorney Docket : No. 6351-75 U6 : (206351.0201)

COMMUNICATION AFTER ALLOWANCE UNDER 37 C.F.R. 1.312

This Communication is being submitted concurrently with payment of the Issue Fee due on or before November 14, 2001.

While reviewing the file history of the above-identified application after receiving the Notice of Allowance, the undersigned attorney noticed that the name of the inventor was incorrectly typed in the original Declaration and Power of Attorney as John-Claude Bradley, rather than correctly typed as signed Jean-Claude Bradley. The inventor's name was also incorrectly noted in the accompanying original Official Filing Receipt. In addition, the undersigned attorney also noticed that the Official Filing Receipt does not have a correct listing of the continuing application data.

Enclosed is a newly executed Substitute Declaration and Power of Attorney with the correct spelling of the inventor's name. Please correct the records of the U.S. Patent and Trademark Office to indicate the inventor's correct name.

Please also correct the records of the U.S. Patent and Trademark Office to indicate the proper continuing data as correctly noted in the first paragraph of the patent application. The updated correct continuing data is as follows:

This application is a continuation of International Patent Application PCT/US99/21749, filed September 22, 1999, pending when the present application was filed but now abandoned, which is based on U.S. Provisional Patent Application 60/101,363, filed September 22, 1998.

This application is also a continuation-in-part of U.S. Non-Provisional Patent Application 09/061,818, filed April 16, 1998, pending when the present application was filed but now U.S. Patent 6,120,669, which in turn is based on the following U.S. Provisional Applications:

Provisional Application 60/043,265, filed April 16, 1997;

Provisional Application 60/048,475, filed June 3, 1997;

Provisional Application 60/066,905, filed November 14, 1997;

Provisional Application 60/079,722, filed March 27, 1998.

Please acknowledge that these corrections have been made and will be so reflected in the patent to issue on this application.

Respectfully submitted,

JEAN-CLAUDE BRADLEY
